

## Atlas 150 Pasta Machine Thickness by Setting

| Setting | Millimeters |        |       | Decimal<br>Inches | Fractional<br>Inches |
|---------|-------------|--------|-------|-------------------|----------------------|
|         | Left        | Center | Right |                   |                      |
| 0       | 2.82        | 2.72   | 2.61  | 0.1030            | 13/128               |
| 1       | 2.60        | 2.51   | 2.42  | 0.0955            | 3/32                 |
| 2       | 2.30        | 2.16   | 2.02  | 0.0800            | 5/64                 |
| 3       | 1.68        | 1.56   | 1.42  | 0.0560            | 7/128                |
| 4       | 1.41        | 1.21   | 1.07  | 0.0420            | 5/128                |
| 5       | 1.12        | 1.03   | 0.90  | 0.0355            | 5/128                |
| 6       | 0.82        | 0.78   | 0.60  | 0.0235            | 3/128                |
| 7       | 0.59        | 0.57   | 0.46  | 0.0180            | 1/64                 |
| 8       | 0.46        | 0.45   | 0.41  | 0.0160            | 1/64                 |
| 9       | 0.37        | 0.37   | 0.41  | 0.0160            | 1/64                 |

This is a table of the thicknesses produced by one sample of the Atlas 150 Classic (Wellness) pasta machine, made by Marcato S.p.A of Italy. 'Left,' 'Center' and 'Right' refers to the position of the measurement as looking at the infeed of the machine.

Measurements were made by passing a short piece of soft wire (solder) through the machine at the various settings and places on the roller, then measuring the thickness of the flattened wire with a micrometer.
